INSPIRONICS – BOARD SESSION

Addressing Key Concerns – Structured Clarifications

Four areas of inquiry have been identified for transparent, fact-based response. Each clarification is grounded in current scope, legal structure, and execution discipline — not assumption.

Are the Numbers Bloated?

- Shift from single product to multi-platform stack — CX, CK, CD, CE, and Mints
- Inclusion of IP assets and Data Room artifacts in total scope
- Reflects expanded scale and depth, not inflation of base figures

Market validation via broker process

Is the Valuation Real?

- ~$40M represents the achievable floor based on current-state assets
- ~$80–100M reflects execution-driven upside — not a baseline assumption
- Realization is contingent on decisions made in the next 60–90 days

Execution determines realization

Why Are Only Some Contributing?

- Fairness requires alignment between contribution and position
- Standard dilution mechanism applied across the board
- ✓ Contributors maintain full position — ⚠ Non-contributors are diluted

No free-rider outcome

Where Is Share Transfer?

- No forced share transfer is involved or proposed
- New capital is introduced exclusively via new share issuance
- Structure is legally clean and fully NJ-compliant

Fairness through dilution, not redistribution

Transparency

All figures and scope changes fully disclosed to the board

Fairness

Contribution-aligned mechanisms protect active stakeholders

Execution Discipline

Upside is earned — tied directly to the next 60–90 day milestones
