

Building the Enterprise Operational Intelligence Platform

Inspironics + Enmaz

From Buildings and Factories Today — To Autonomous Enterprises Tomorrow

Why This Alliance Matters

The Enterprise Fragmentation Problem

- Sensors, BMS, analytics, ESG tools, and maintenance bought from five separate vendors
- Result: siloed systems with no Digital Twin, no AI, and no ESG intelligence
- Operational cost and complexity compound with every added point solution

The Alliance Solution

Measure → Connect → Optimize

1

Enmaz: Measure + Deploy —
sensors, commissioning, field support

2

Inspironics: Connect + Model + Predict —
CK Platform, Digital Twin, AI

3

Customer: Optimize + Monetize —
real outcomes, recurring value

Alliance Operating Model

Clear Ownership. No Overlap.

1. Enmaz owns:

commercial buildings, factories, instrumentation, commissioning, maintenance, energy audits, power quality, vibration, IAQ

2. Inspironics owns:

CK Platform, CE Platform, Digital Twin, AI Agents, ESG Intelligence, Cloud, Cybersecurity, APIs, Marketplace

Joint Go-To-Market: Five Phases

- 1 Phase 1** — Commercial Buildings: offices, IT parks, campuses, mixed-use
- 2 Phase 2** — Factories: automotive, food processing, electronics, textiles
- 3 Phase 3** — Data Centers: edge, enterprise, colo
- 4 Phase 4** — Healthcare
- 5 Phase 5** — Hospitality via CX/CD platform

Enmaz Hardware Portfolio

Field-Proven Devices Across Every Vertical

- 01 IAQ Sensor** – buildings, hospitals, data centers, clean rooms
- 02 Vibration Sensor** – motors, pumps, compressors, fans, DG sets, structural health
- 03 Data Logger** – utilities, energy monitoring, compliance
- 04 Protocol Converter** – BACnet, Modbus, OPC
- 05 Spectrum Analyzer** – harmonics and power quality

Inspironics Device Portfolio

1. Kleio IntelliHub™ — Universal Edge Gateway
2. Mikos AirQ™ — Advanced Environmental Intelligence
3. Amenos™ — Comfort & HVAC Intelligence
4. Afi™ — Access Intelligence
5. Kinisi™ — Occupancy Intelligence

Combined Device Architecture

From Physical Layer to Business Applications

- Enmaz + Inspironics sensors → Kleio IntelliHub (edge)
- CK Platform → Digital Twin engine
- CE Intelligence → Business applications and insights

Building Intelligence Stack

What Enmaz Has + What CK/CE Adds

TODAY

- ✓ occupancy
- ✓ lighting
- ✓ water
- ✓ energy
- ✓ IAQ

WITH CK + CE

- ✓ Digital Twin
- ✓ ESG
- ✓ AI Agents
- ✓ predictive maintenance
- ✓ portfolio benchmarking
- ✓ carbon accounting
- ✓ enterprise analytics

Factory Intelligence Stack

From Condition Monitoring
to Autonomous Operations

- Today: vibration, energy, power quality, DAQ
- With CK + CE: OEE, APM, predictive maintenance, Digital Factory Twin, AI recommendations, sustainability intelligence

Digital Twin Expansion

From Building Automation to Enterprise Intelligence

- Building Twin → Asset Twin → Utility Twin
- Occupancy Twin → Sustainability Twin
- Enterprise Twin — the unified operating model

CK Platform Architecture

Edge to Intelligence in a Single Stack

- Edge → MQTT → Stream Processing → Time Series DB
- Data Lakehouse → Digital Twin → AI Models
- Applications layer — where business outcomes are delivered

CE ESG Platform

From Static Consulting Reports to Continuous Intelligence

- ✗ • **Today:** static, periodic, consulting-driven ESG reporting

- ✓ • **Tomorrow:** continuous ESG, automated carbon accounting, BRSR, CSRD, ISSB, SEC Climate, GRI — all from live sensor data

AI Agent Framework

Autonomous Intelligence Across Every Function

- 1 | **Operations Agent** — real-time facility optimization
- 2 | **Maintenance Agent** — predictive and prescriptive actions
- 3 | **Energy Agent** — demand response and efficiency
- 4 | **ESG Agent** — continuous sustainability intelligence
- 5 | **Occupancy Agent** — space utilization and comfort
- 6 | **Executive Agent** — portfolio-level insights and decisions

Data Monetization Opportunity

From Project Revenue to
Recurring Platform ARR

Today: projects, installations,
maintenance contracts

Tomorrow: SaaS, AlaaS, ESGaaS,
DaaS, Digital Twin subscriptions —
compounding recurring revenue

System Integrator Marketplace

Enmaz's SI Network Becomes a Certified Partner Ecosystem

- Today: established SI network with strong field reach
- Tomorrow: Certified CK, CE, ESG, and Digital Twin partners — a scalable, revenue-generating marketplace

Academia CoE Strategy

Building IP Moats Through Research Partnerships

- **Partners:** IITs, universities, research labs, government programs
- **Output:** AI models, open datasets, Digital Twin templates, ESG libraries
- Accelerates platform depth while reducing internal R&D cost

Strategic Moat

Three Compounding Advantages No Single Competitor Can Replicate

DEPLOYMENT
NETWORK

PLATFORM
IP

JOINT DATA
NETWORK

1

Enmaz Deployment Network — on-the-ground reach and trust

2

Inspironics Platform IP — CK, CE, Digital Twin, AI, and ESG

3

Joint Data Network — proprietary operational data that deepens with every installation

Exit & Growth Narrative

We Are Building the Open-Architecture Enterprise Intelligence Platform

- 1 Not a sensor company. Not a BMS company. Not an ESG consultancy.
- 2 Strategic peer to Siemens Building X, Schneider EcoStruxure, Honeywell Forge — but open, faster, multi-vertical, and Agentic AI native

LEGACY MONOLITHIC BUILDING AUTOMATION SYSTEMS

SILOED • PROPRIETARY • INFLEXIBLE • REACTIVE

OPEN, AGENTIC, MULTI-VERTICAL ENTERPRISE PLATFORM

OPEN &
INTEROPERABLE

FASTER
TIME TO VALUE

MULTI-VERTICAL
SCALE

AGENTIC AI
NATIVE

2026–2030 Joint Roadmap

Five Years to the Autonomous Enterprise

1. 2026 – Commercial Buildings + Factories: joint go-to-market launch

2. 2027 – Portfolio Scale: multi-site deployments, SI marketplace live

3. 2028 – Digital Twin Rollout: enterprise-wide twin coverage

4. 2029 – Agentic AI Operations: autonomous decision-making at scale

5. 2030 – Autonomous Enterprise Platform: the full vision realized
