

Strategic ESG & Sustainability Partnership

Cielo Epic × Enzo Advisors LLC

Technology-Powered ESG Strategy, Execution & Investor Readiness

Why This Partnership Matters

Strategy

ESG frameworks, materiality assessments, and institutional-grade advisory that align with global standards and investor expectations.

Technology

AI-driven platform for real-time data capture, predictive analytics, and connected intelligence across operations.

Impact

Measurable ESG outcomes that drive value creation, operational efficiency, and long-term resilience for enterprises.

ESG is rapidly evolving from a compliance checkbox to a strategic value driver. Enterprises need more than presentations—they need integrated strategy and execution. Together, Cielo Epic and Enzo Advisors deliver end-to-end ESG transformation that bridges vision with measurable results.

ESG Strategy with Institutional Credibility

Enzo Advisors LLC is a boutique global ESG and sustainability advisory firm with deep expertise serving corporates and institutional investors. The firm specializes in developing robust ESG frameworks, conducting materiality assessments, and delivering investor-grade disclosures and KPIs.

With a track record of guiding organizations through complex ESG challenges, Enzo Advisors brings strategic clarity and governance rigor to every engagement.

Governance

Board-level ESG integration and risk oversight frameworks

Strategy

Materiality-driven ESG roadmaps aligned with business objectives

AI-Driven ESG & Connected Intelligence Platform

Cielo Epic is an advanced AI, IoT, and analytics-driven sustainability platform that transforms how organizations capture, analyze, and act on ESG data. The platform delivers real-time insights through connected intelligence, enabling enterprises to move from reactive reporting to proactive ESG management.

1

Real-Time Data Capture

IoT sensors and connected devices continuously monitor environmental and operational metrics across facilities and assets.

2

Predictive Analytics

Machine learning algorithms forecast ESG risks, identify optimization opportunities, and simulate scenario outcomes.

3

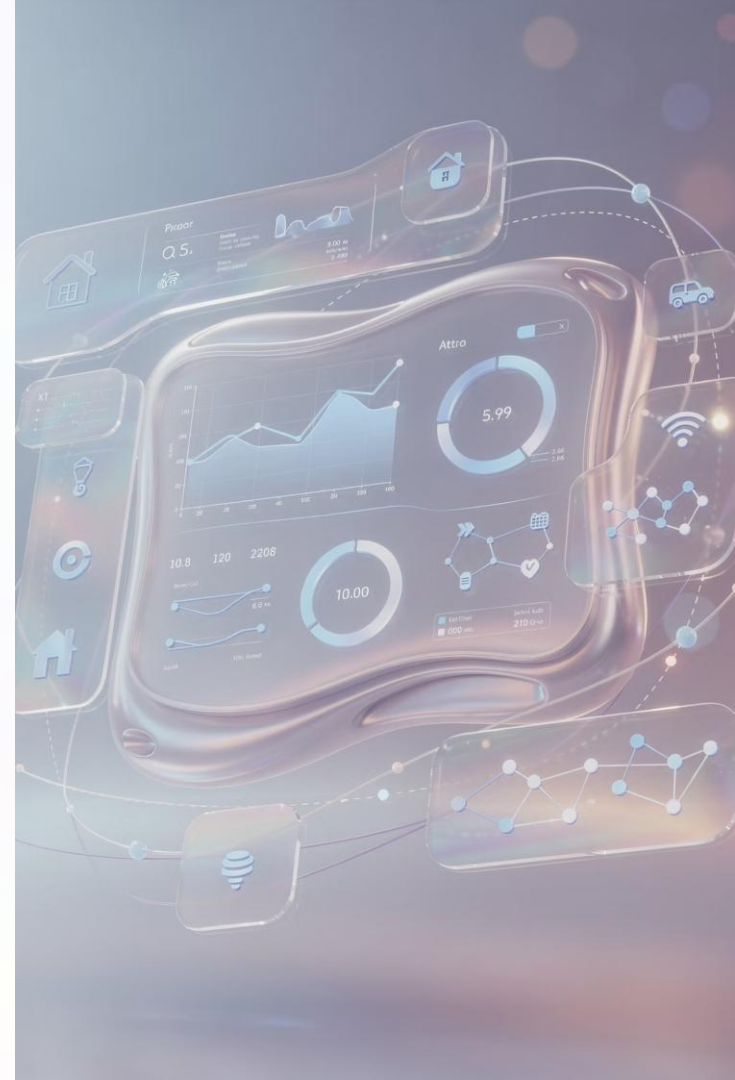

Digital Twin Technology

Virtual replicas of physical operations enable testing and optimization without operational disruption.

4

Enterprise Dashboards

Customizable interfaces provide owners and operators with actionable insights and performance tracking.

Market Forces Driving ESG Urgency

Regulatory Pressure

Mandatory disclosure requirements from SEC, EU CSRD, and global regulators are forcing transparency and standardization across industries.

Investor Demand

Institutional investors increasingly allocate capital based on measurable ESG performance and risk management capabilities.

Operational Efficiency

ESG initiatives drive cost optimization through energy reduction, waste minimization, and resource efficiency improvements.

Long-Term Resilience

Proactive ESG management strengthens reputation, mitigates risks, and builds stakeholder trust for sustainable growth.

The convergence of regulatory mandates, investor expectations, and operational imperatives makes ESG transformation no longer optional—it's a strategic necessity for competitive enterprises.

Strategy Meets Execution

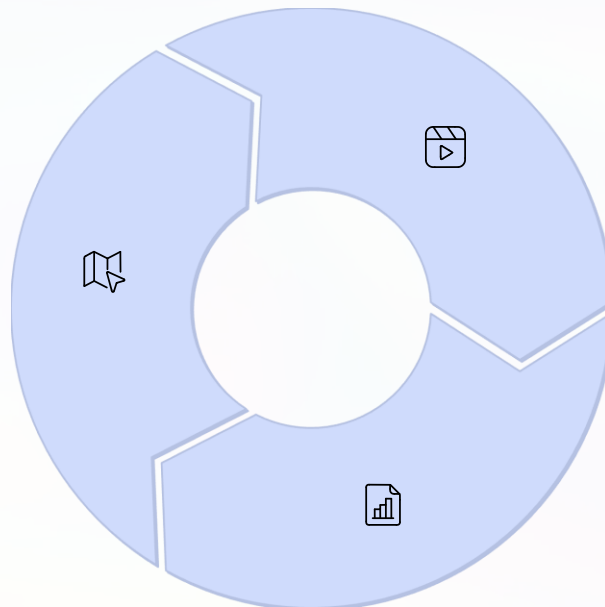

The partnership between Enzo Advisors and Cielo Epic creates a comprehensive ESG solution that addresses both strategic direction and operational implementation. This integrated approach delivers value that neither advisory nor technology alone can achieve.

Capability	Enzo Advisors	Cielo Epic
ESG Strategy	Framework development, materiality assessment, roadmap design	Strategy operationalization through data infrastructure and KPI tracking
Data & Technology	Data governance standards, disclosure requirements, quality assurance	IoT deployment, AI analytics, real-time monitoring, digital twins
Reporting & KPIs	Investor-grade reporting frameworks, narrative development, assurance	Automated data aggregation, visualization, continuous performance tracking
Investor Readiness	ESG positioning, stakeholder engagement, credibility building	Data transparency, audit trails, evidence-based performance demonstration
Operational Impact	Change management, organizational alignment, capability building	Process optimization, resource efficiency, predictive maintenance

From ESG Vision to Measurable Outcomes

ESG Strategy + Technology Implementation

Comprehensive advisory services paired with platform deployment create a foundation for sustained ESG excellence and competitive advantage.

Real-Time, Data-Driven ESG Execution

Connected intelligence enables proactive decision-making, continuous improvement, and agile response to emerging ESG challenges.

Investor-Grade ESG Reporting & Insights

Transparent, auditable data and sophisticated analytics generate credible disclosures that meet institutional investor requirements.

This integrated approach transforms ESG from a reporting exercise into a strategic capability that drives operational performance, investor confidence, and long-term value creation. Organizations gain both the roadmap and the tools to execute with precision.

How We Work Together

Integrated Offering

Seamless combination of advisory services and technology platform as a unified ESG transformation solution for enterprise clients.

Co-Branded Framework

Joint ESG maturity diagnostics and assessment methodology that evaluates current state and defines transformation pathways.

Executive Engagement

Collaborative workshops, board briefings, and thought leadership content that positions clients as ESG leaders in their sectors.

Platform + Advisory Integration

Technology implementation supported by ongoing strategic guidance ensures maximum value realization and organizational adoption.

Who Benefits Most

Corporates & Enterprises

Large organizations seeking to transform ESG from compliance burden to strategic advantage with comprehensive data infrastructure and investor-ready reporting.

Scale-Ups & Mid-Market

Growing companies building ESG foundations that support future capital raising, M&A readiness, and sustainable scaling of operations.

Institutional Investors

Investment firms and funds requiring portfolio company ESG visibility, performance tracking, and risk management across diverse holdings.

Public Sector & Infrastructure

Government entities and infrastructure operators managing complex assets with stakeholder accountability and long-term sustainability mandates.

Measuring What Matters

Success in ESG transformation requires clear, measurable indicators that track both process maturity and outcome delivery. Our joint approach establishes comprehensive KPIs that demonstrate value to all stakeholders.

35%

ESG Score Improvement

Average rating enhancement within 18 months

40%

Emissions Reduction

Scope 1 & 2 GHG optimization potential

60%

Time to Compliance

Faster readiness for disclosure mandates

4.2x

Investor Confidence

Increase in ESG-focused engagement

Operational Metrics

- Energy consumption per unit output
- Water usage efficiency and recycling rates
- Waste diversion from landfill percentage
- Supply chain sustainability scores

Strategic Indicators

- Board-level ESG governance maturity
- Employee engagement in sustainability initiatives
- ESG-linked financing cost reductions
- Reputation and brand value enhancement

Path to Market Impact

1

Phase 1: Alignment & Pilots

Q1-Q2

Leadership alignment, go-to-market strategy refinement, pilot client identification, co-branded materials development, and initial engagement framework validation.

2

Phase 2: Client Engagements

Q2-Q3

Joint client deliveries, case study development, platform integration refinement, advisory process optimization, and expansion of target sector focus.

3

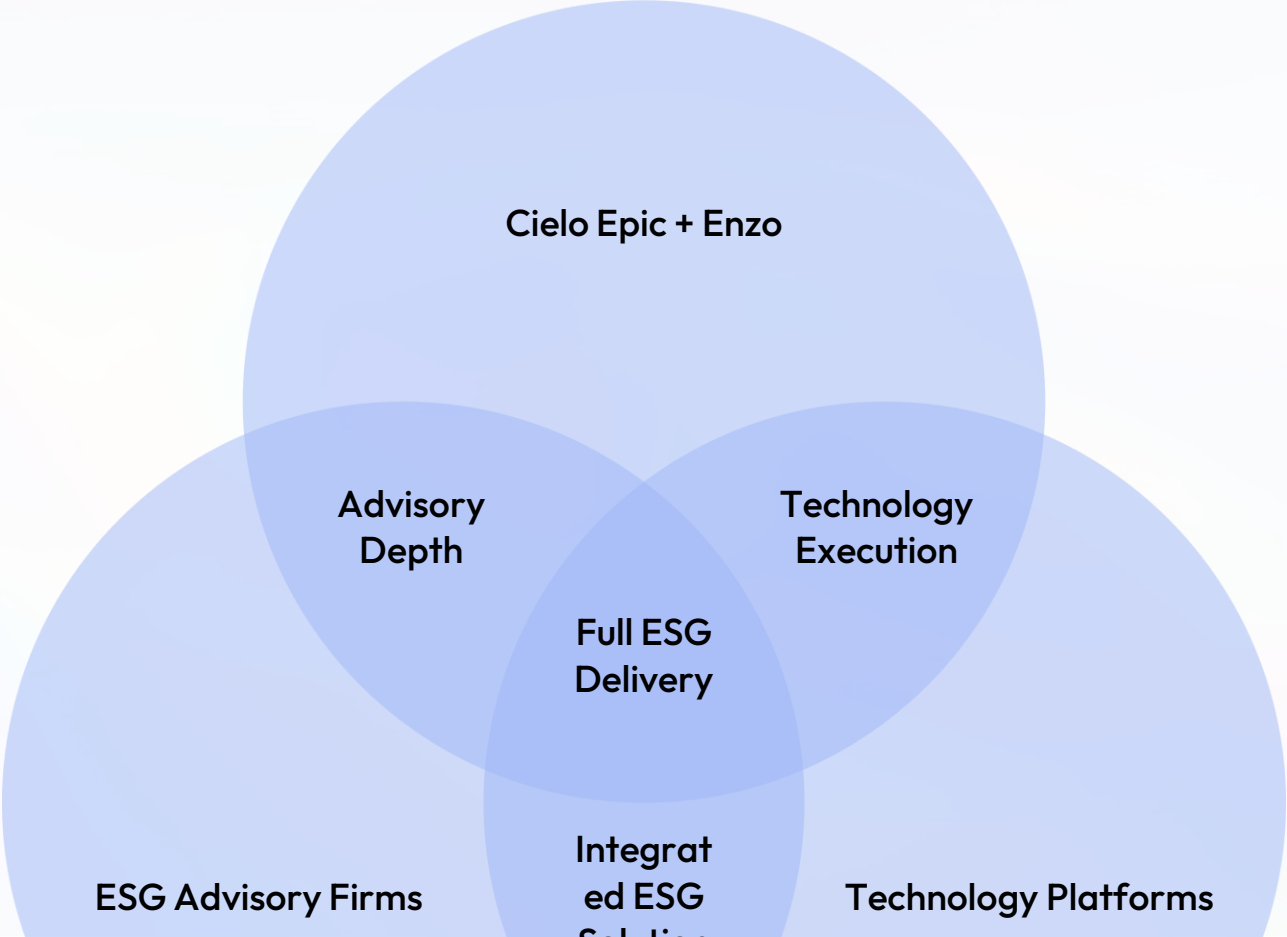

Phase 3: Scale & Leadership

Q4+

Market scaling through channel partnerships, thought leadership campaigns, industry event presence, expanded service offerings, and strategic alliance development.

This phased approach ensures methodical validation, learning, and scaling while building market credibility and demonstrating tangible client value at each stage. Success metrics and learnings from each phase inform the next, creating a foundation for sustainable growth.

Why This Combination Is Unique

Execution with Clarity

Every strategic partnership faces potential challenges. We've identified key risks and established clear mitigation strategies to ensure successful collaboration and client value delivery.

Role Clarity

Risk: Unclear boundaries between advisory and technology responsibilities could create client confusion or internal friction.

Mitigation: Defined engagement playbooks, joint account planning processes, and clear service demarcation in all client-facing materials and contracts.

Client Adoption

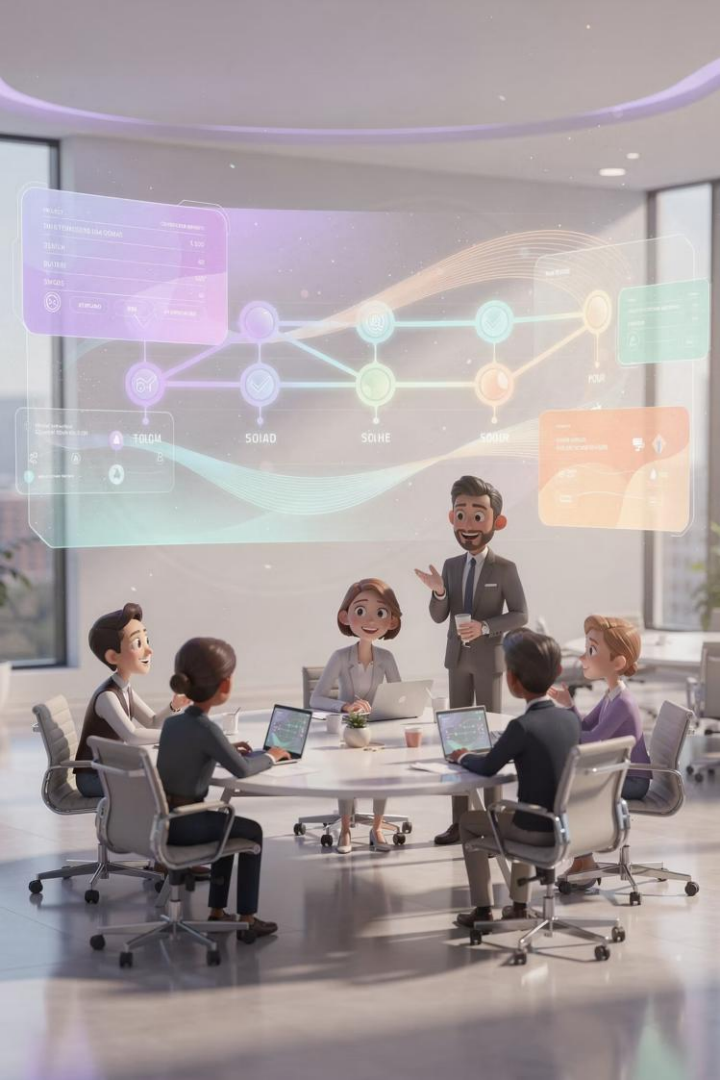

Risk: Organizations may struggle with change management when implementing comprehensive ESG transformation initiatives.

Mitigation: Structured change management frameworks, executive sponsorship development, phased rollout approaches, and ongoing support programs.

Data Governance

Risk: Data quality, security, and credibility concerns could undermine platform value and reporting confidence.

Mitigation: Robust data governance standards, third-party assurance frameworks, SOC 2 compliance, and transparent audit trails throughout the platform.

From Alignment to Action

01

Leadership Alignment Session

Joint leadership workshop to align on partnership vision, value proposition, market positioning, success metrics, and organizational integration points.

02

Define Pilot Clients

Identify 2-3 ideal pilot opportunities that represent target segments, validate the integrated model, and can serve as future case studies.

03

Co-Develop Engagement Framework

Build joint delivery methodology, client assessment tools, pricing models, and go-to-market materials that represent the partnership brand.

04

30-60-90 Day Execution Plan

Detailed implementation roadmap with specific milestones, resource commitments, revenue targets, and performance indicators for the first quarter.

These foundational steps transform partnership intent into operational reality. Clear accountability, defined timelines, and measurable outcomes ensure momentum and demonstrate commitment from both organizations.

Building the Future of ESG Intelligence

Strategy. Technology. Measurable Impact.

The intersection of institutional-grade ESG advisory and AI-driven technology creates unprecedented opportunities for organizations committed to sustainability leadership. Together, Cielo Epic and Enzo Advisors are defining a new standard for ESG transformation—one that moves beyond compliance to create lasting competitive advantage and stakeholder value.

Partnership Foundations

Shared Vision for ESG Excellence

This partnership is built on complementary strengths and shared commitment to transforming how organizations approach ESG. By combining deep advisory expertise with cutting-edge technology, we create solutions that address the full spectrum of ESG challenges—from strategy development through operational execution to investor communication.

Our clients benefit from a unified approach that eliminates traditional gaps between consulting recommendations and technology implementation, accelerating time to value and ensuring sustainable results.

Complementary Expertise

Advisory depth meets technology execution

Unified Client Experience

Seamless delivery from strategy to operations

Market Leadership

Defining next-generation ESG solutions
