

Inspironics AIoT ESG Platform Architecture

A unified, three-layer architecture enabling scalable AIoT integration and ESG intelligence — from edge sensors to cloud-native monetization. Each layer is purpose-built to drive operational continuity, data fidelity, and sustainability outcomes across the enterprise.

Top Layer — CIELO EPIC

- ESG Intelligence & Reporting
- AI/ML Optimization Engines
- Monetization via Mints

Middle Layer — CALEIDO KOMBOS

- IoT Data Platform Core
- APIs & System Integration
- Analytics Pipelines

Base Layer — Edge & Facility

- CX → Facility Systems
- CD → Sensors: Amenos, Afi, Kinisi
- Real-time Edge Ingestion

Mobile Layer — Vishnu

Native mobile applications surfacing real-time AIoT and ESG insights to field operators and facility managers, enabling on-the-go decisioning at the edge.

Dashboards — Ikanos → CE Evolution

Progressive dashboard evolution from Ikanos-based reporting toward a fully converged Customer Experience (CE) intelligence layer, unified across ESG KPIs and operational metrics.

Unified architecture enabling scalable AIoT + ESG intelligence — from sensor to strategy.
