

# Cielo Epic

Cognitive Operating System  
for Connected Enterprises

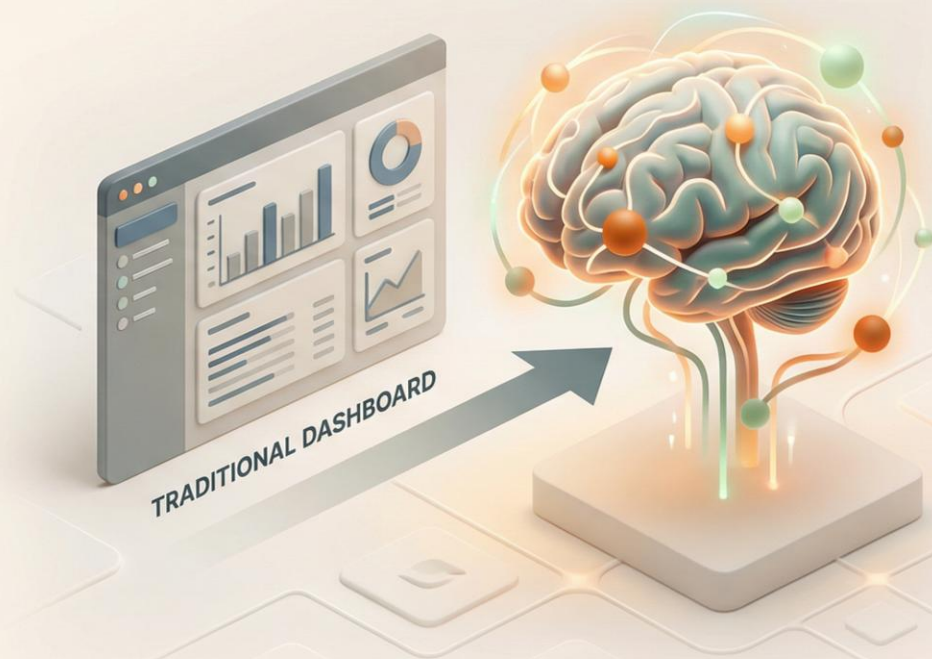

# Enterprises Are Connected — But Not Intelligent

- Fragmented systems across operations, energy, ESG, experience
- Dashboards describe the past, not decisions
- AI and ESG tools exist, but in silos

# Not a Dashboard — A Cognitive Operating System

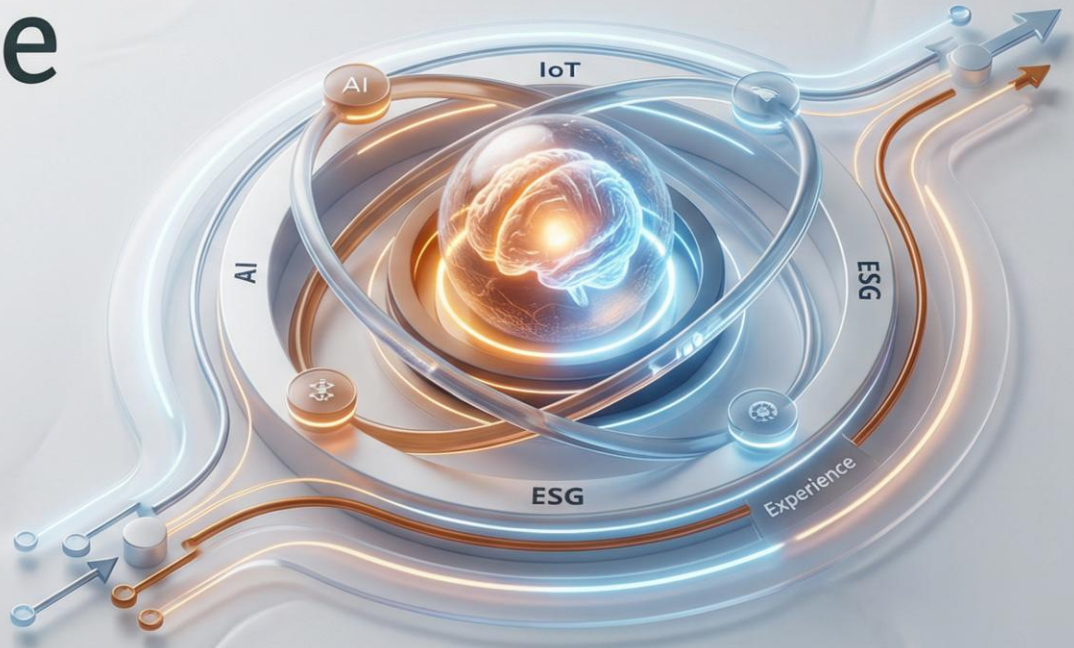

- AI-native, not analytics retrofitted
- ESG + Energy + Ops in one stack
- Digital twins with Gen-AI explanations
- Built for owners, not just operators

# One Cognitive Platform That Runs the Enterprise

- Unified AI + IoT + ESG + Experience
- Monitoring → prediction → autonomous action
- Built for scale, compliance, and ROI

# Modular EPICS — Each a Revenue Engine

- **AI Intelligence:** Predictive, Prescriptive, Digital Twins, Gen-AI
- **ESG & Optimization:** ESG reporting, Energy, Carbon, Water
- **Operations & Experience:** Facilities, Smart Rooms, Automation
- **Integration Layer:** HTNG, OT/IT, APIs, IoT

# Scalable, Expansion-Driven Revenue Model

## EPIC Pricing:

- ESG / Energy EPIC: \$30K–\$60K per asset / year
- AI Intelligence EPIC: \$40K–\$80K per asset / year
- Operations EPIC: \$25K–\$50K per asset / year

Typical Enterprise Bundle: \$120K–\$250K ARR

Net Revenue Retention target: 130–150%

# Clear, Measurable ROI for Owners

- Energy savings: 10–20% per asset
- Operational cost reduction: 15–25%
- ESG reporting cost reduction: 40–60%
- Payback period: 6–12 months

## Example ROI:

20-building portfolio

\$400K annual energy spend per building

15% optimization → \$1.2M annual savings

# From Connected Assets to Autonomous Enterprises

- Hospitality, Commercial Buildings, Infrastructure
- Focus: North America & Middle East
- ESG-native, AI-first, outcome-driven

# Early Traction & Proven Value

## Current Deployment:

- 40+ enterprise buildings under management
- \$2.8M ARR with 140% net retention
- Average customer expansion: 2.3 EPICs within 18 months

## Pilot Partners Include:

- Luxury hospitality portfolio (Middle East)
- Class-A commercial real estate (North America)
- Smart infrastructure developer

# Building the Cognitive Layer for Enterprise Infrastructure

Series A: \$12M

## Use of Funds:

- Enterprise sales expansion (North America + Middle East)
- EPIC platform development (Gen-AI, advanced digital twins)
- Strategic partnerships with ESG platforms and property tech leaders

We're creating the operating system where every enterprise asset doesn't just connect—it thinks, optimizes, and acts.
