

Caleido Xenia (CX)

AIoT-Enabled Smart Infrastructure Platform — by **Inspironics Technologies Pvt. Ltd.**

TRL 5 · INVESTOR DECK

The \$500B Problem

Buildings That Can't Think

⚡ Energy Waste

Disconnected systems burn energy with zero visibility

🔧 Unplanned Downtime

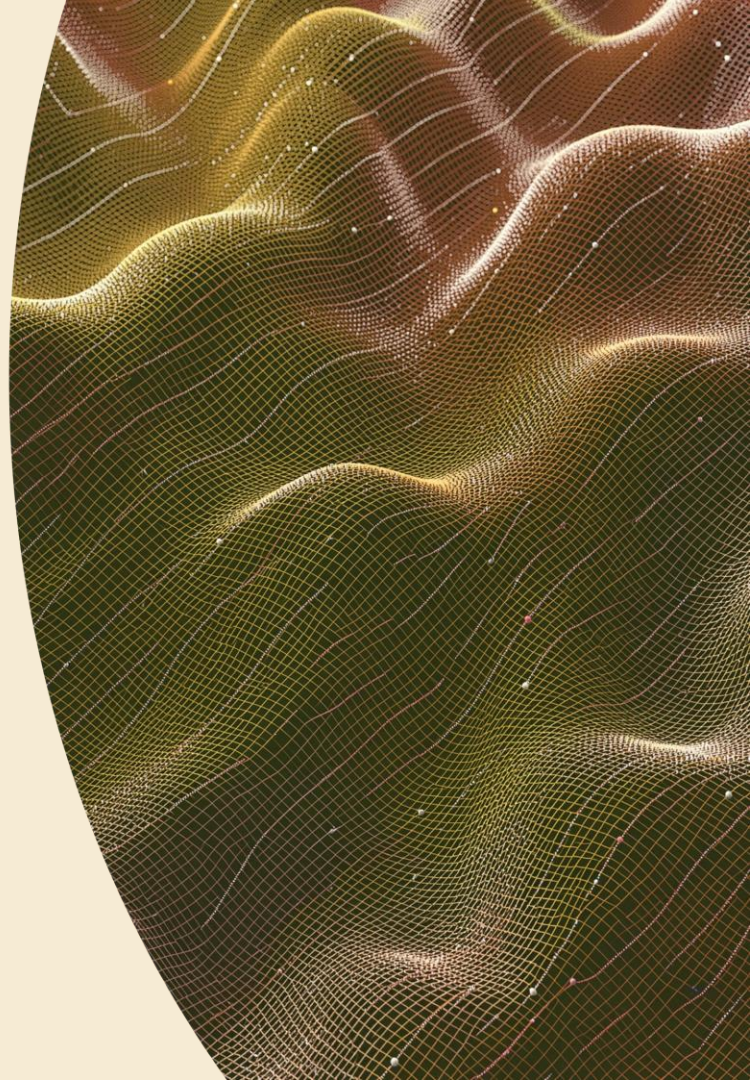

Reactive maintenance halts operations at peak cost

📄 Compliance Gaps

Manual reporting fails audits and ESG mandates

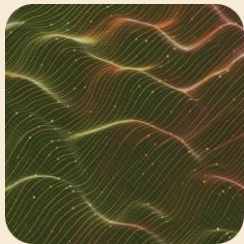

🔒 Siloed Systems

Legacy tools don't talk to each other — or to the future

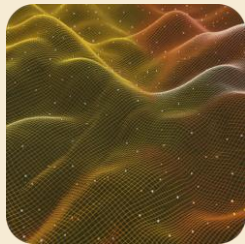

Introducing Caleido Xenia

One Platform. Total Facility Intelligence.

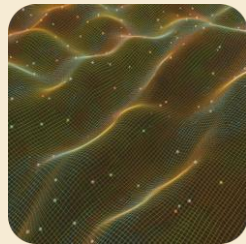

Energy Management

Real-time monitoring and optimization

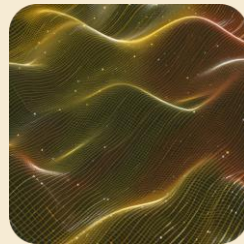

Environmental Intelligence

Air, temperature, humidity — always aware

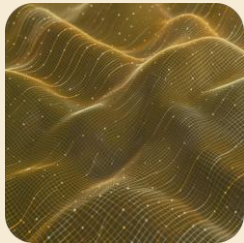

Occupancy Intelligence

Smart space utilization at scale

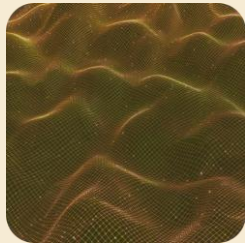

Predictive Maintenance

AI-driven alerts before failures occur

Sustainability Reporting

Automated ESG compliance and audit trails

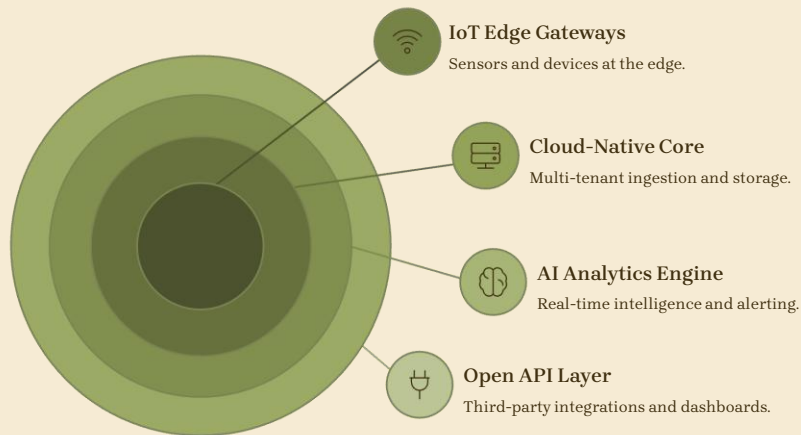

Connected Operations

Open APIs for seamless third-party integration

Platform Architecture

Built for Scale

Why It Scales

Edge-to-Cloud

Low-latency IoT gateways feed a cloud-native core

Multi-Tenant

Isolated, secure environments per enterprise client

Open APIs

BMS, ERP, and third-party integrations out of the box

TRL 5 Validated

Proven in Real Environments

1

Core Architecture Operational

Platform backbone fully deployed
and stable

2

IoT Integrations Validated

Sensor and device connectivity
confirmed across hardware types

3

Data Workflows Demonstrated

Collection, visualization, and
alerting pipelines live

4

Prototype Deployments Complete

Controlled environment testing successfully concluded

5

Early Customer Validation

Use-case evaluations conducted with real enterprise
prospects

Use Cases Across High-Value Verticals

Commercial Real Estate

Energy cost reduction, smart HVAC, tenant experience optimization

Manufacturing

Equipment uptime, floor-level environment monitoring, OEE improvement

Healthcare

Critical environment compliance, air quality, asset tracking

Smart Campuses

Occupancy-based resource allocation, sustainability reporting, unified ops

Roadmap to Commercial Readiness

TRL 5 »→ TRL 8–9

1

TRL 5 — Now

Validated in relevant environments. Early customer evaluations complete.

2

TRL 6

Pilot deployments. Scalability improvements. Advanced analytics rollout.

3

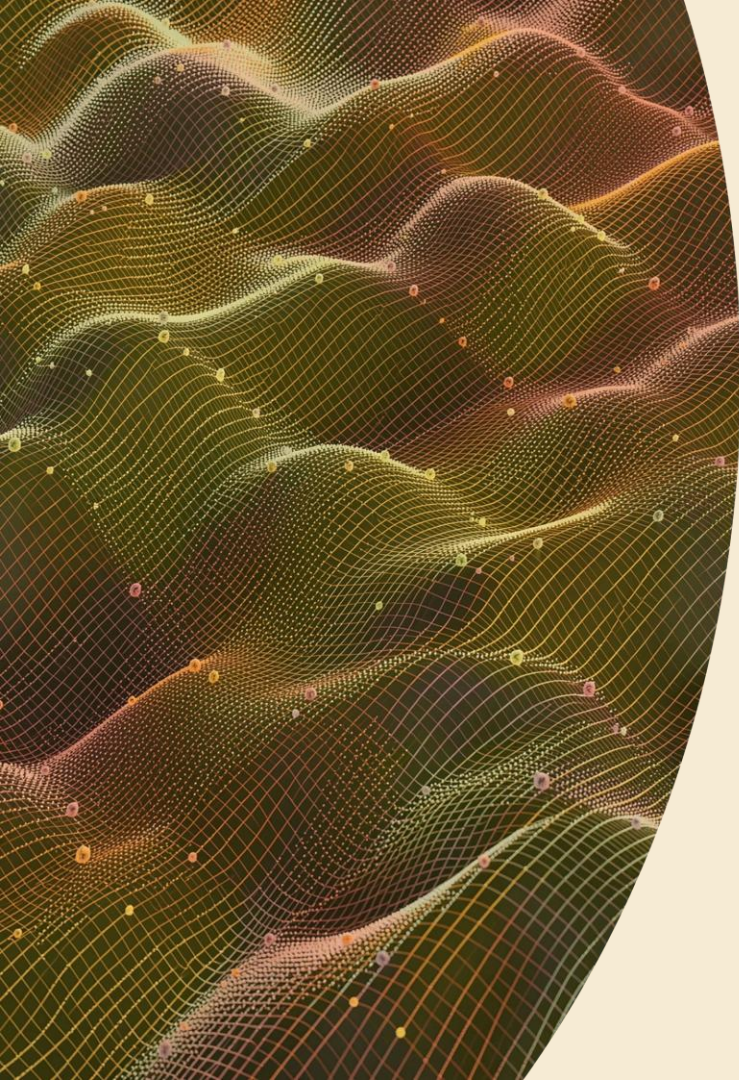

TRL 7

Expanded device compatibility. Full enterprise system integrations.

4

TRL 8–9

Full commercial deployment. Market scale-up. Revenue operations.

Build the Future With Us

Join Us in Building the Future of Smart Infrastructure

Inspironics Technologies is seeking **strategic investment** to accelerate Caleido Xenia from TRL 5 to commercial scale — capturing a rapidly growing global AIoT smart building market.

Platform

TRL 5 validated, production-ready architecture

Market

\$500B+ addressable opportunity in smart infrastructure

Partnership

Strategic capital to unlock TRL 6–9 milestones
