

Caleido Xenia Pvt. Ltd. Cognitive Infrastructure for an ESG-First World

Elevate 2026 Pitch · Karnataka Startup Cell · Department of Electronics, IT, BT

SEED STAGE · ₹50 LAKH GRANT-IN-AID

ESG Is Now a Board-Level Mandate — But Operations Are Still Flying Blind

The Scale of the Problem

India's commercial buildings consume 15% of India's total energy, yet operational decisions remain reactive, manual, and entirely disconnected from ESG outcomes. Enterprises are managing critical sustainability obligations with tools designed for a different era.

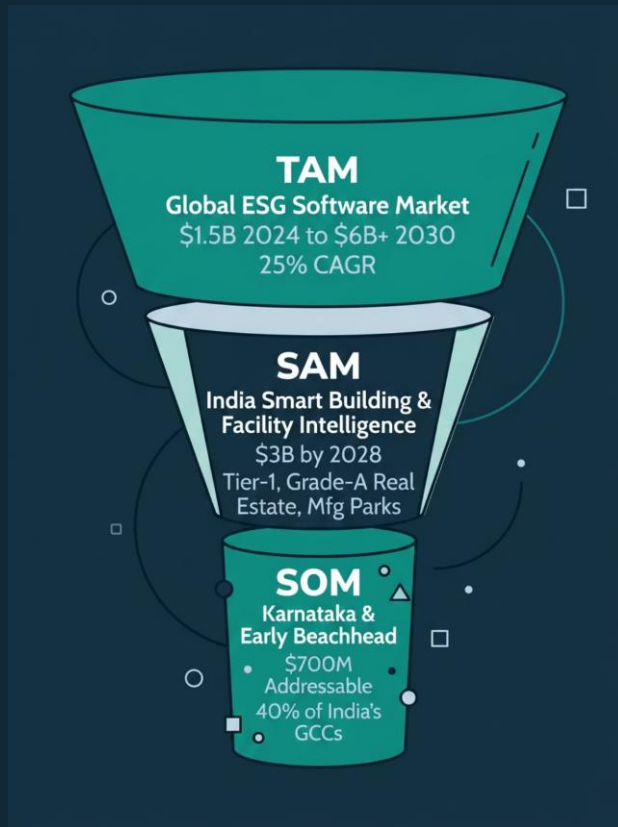

The Compliance Pressure

- **SEBI BRSR** Core disclosures mandatory for top 1,000 listed companies
- **RBI climate-risk guidelines** effective FY26
- **EU CBAM** imposing Scope 1/2/3 reporting on Indian exporters
- **India's Emissions Trading Scheme** still collected via spreadsheets — quarterly, unauditable, and legally exposed

The Result: Missed sustainability targets, regulatory risk, wasted opex of 15–20% of revenue. Existing BMS, IoT, and ESG-reporting tools remain siloed — none drives real-time decisions.

A Multi-Billion Market Is Shifting from "Report ESG" to "Operate by ESG"

Why This Market, Why Now

- Global ESG software market: **~US\$1.5B (2024) → US\$6B+ by 2030**
CAGR
- India smart-building & facility-intelligence TAM: **~US\$3B by 2028**
- SAM (Tier-1 enterprises, Grade-A real estate, manufacturing parks, public infra): **~US\$700M**
- BRSR mandate covers top 1,000 listed companies today, expanding downstream by FY27
- Karnataka alone hosts — primary early adopters

Key Insight: The shift from periodic reporting to real-time operational ESG is a once-in-a-decade market inflection — and no Indian-native platform owns it yet.

Caleido Xenia Powers the Intelligence. Cielo Epic Delivers It to the Enterprise.

Inspironics has engineered a three-tier cognitive infrastructure stack — purpose-built for ESG-native operations at enterprise scale.

Cielo Epic — Ultimate Enterprise Platform

Xenia + AIoT + ESG telemetry + Caleido Mints, productised as a single enterprise-grade SaaS. What the buyer deploys. Integrates in days, not quarters.

Caleido Mints — Layered Modular Apps

BRSR auto-disclosure · Scope-3 supplier intelligence · Energy-carbon-comfort optimizer · ESG-linked finance · Predictive risk · Tenant impact. Mix-and-match as needed.

Caleido Xenia — Cognitive Intelligence Core

Ingests data from BMS, IoT sensors, energy meters, HVAC, water, waste, HR & ERP. Harmonizes into an ESG-native data model. Runs AI/ML decision graphs continuously.

Cielo Epic — One Platform. Every ESG Decision. In Real Time.

Cielo Epic surfaces the full power of Caleido Xenia through an enterprise command centre, giving facility managers, CFOs, and sustainability leads a single source of operational truth.

Cielo Epic ESG Command Centre

Unified real-time view of energy, carbon, water, waste, and compliance status across all sites. Powered by Caleido Xenia's live decision graph.

Caleido Mint — Energy-Carbon-Comfort Optimizer

Multi-objective AI model that continuously balances energy costs, carbon intensity, and occupant comfort. Delivers 15+ savings with zero manual intervention.

Caleido Mint — BRSR Auto-Disclosure

Automates SEBI BRSR Core filings from live operational data. Reduces ESG reporting effort risk.

Regulation, Capital, and Technology Have Converged

Regulation

SEBI BRSR Core (FY24+), RBI climate disclosures (FY26), EU CBAM affecting Indian exporters — compliance is no longer optional.

Capital

ESG-linked debt and green bonds crossed **₹50,000 Cr** in India in 2024. Investors now penalise non-compliant operators at the portfolio level.

Technology

Edge AI, low-cost IoT, and LLM-based analytics make real-time cognitive infrastructure **economically viable at last** — the cost curve has broken.

Demand

GCCs, BFSI, and manufacturing occupiers now **mandate ESG SLAs** in lease and vendor contracts. Operators who cannot deliver ESG data lose tenants.

- ✓ **The window is now:** All four forces have aligned simultaneously — a rare market condition that rewards first movers with durable category ownership.

Cielo Epic Isn't Another ESG-Reporting Tool. It's a Decision Engine.

The competitive landscape is fragmented between legacy BMS vendors, point ESG-reporting SaaS tools, and standalone energy monitors. None of them do what Cielo Epic does.

Capability	Cielo Epic	BMS Vendors	ESG Reporting SaaS	Energy Monitoring
Real-time operational intelligence	✓ Yes	⚠ Partial	✗ No	⚠ Partial
Prescriptive (not just descriptive)	✓ Yes	✗ No	✗ No	✗ No
ESG-native data model (Xenia)	✓ Yes	✗ No	⚠ Partial	✗ No
Modular app library (Caleido Mints)	✓ Yes	✗ No	✗ No	✗ No
Multi-asset: buildings + enterprises	✓ Yes	⚠ Partial	✓ Yes	✗ No
India-stack & BRSR ready	✓ Yes	✗ No	⚠ Partial	✗ No

📌 **Our Moat:** Xenia's proprietary ESG ontology + decision graph · Caleido Mints library compounding with every deployment · Edge-to-cloud cognitive pipeline · India-compliance-first design from day one.

Defensible IP Across Xenia, Mints, and Cielo Epic

IP Strategy

Inspironics is building a multi-layer IP moat across every tier of the stack — from core ontologies to deployment orchestration. Each layer reinforces the others.

- 2 patents under preparation for FY26 filing
- 1 software copyright registration
- Registered design filing in progress
- Compliance library: BRSR, GRI, TCFD, ISSB, ISO 14001/50001

Caleido Xenia Core IP

Proprietary ESG ontology and cognitive decision-graph (trade-secret protection active; patent application planned FY26).

Caleido Mints IP

Library of edge-AI models for energy-carbon-comfort multi-objective optimization, Scope-3 supplier graph, and BRSR auto-disclosure logic.

Cielo Epic IP

Modular agent framework for autonomous facility actions; proprietary deployment, integration, and orchestration architecture.

Cielo Epic SaaS + Caleido Mints Add-Ons — Predictable, Scalable, Expanding

Land with Cielo Epic

Annual SaaS subscription per site / per sqft tier. Includes Caleido Xenia engine and a starter Mints pack. ACV: ₹6–25 lakh per enterprise customer.

Expand via Mints

Per-Mint upsell: BRSR auto-disclosure, Scope-3 intelligence, ESG-linked finance, predictive risk, tenant impact. Customers grow ACV naturally over time.

Scale with Edge

One-time edge gateway licence + AMC for hardware-enabled deployments. Unlocks richer telemetry and autonomous actions at the facility level.

70–80%

Gross Margin at Scale

>120%

Net Revenue Retention

Via Mint expansion

₹6–25L

Target ACV Per Customer

Early Signals Are Strong

Current Traction

- Paying pilots in active discussions with Grade-A facility operators in Bengaluru
- LOIs from GCC and BFSI sector operators for Cielo Epic deployments
- Partnership discussions underway with leading facility-management majors
- Recognized under IIT IMPACT program; founder advisory engagements in progress
- Technology validation completed across BMS integration and ESG data harmonization

"Real-time ESG intelligence at the operational level is exactly the gap we've been trying to fill. Cielo Epic's architecture speaks directly to how we think about compliance and cost optimization."

— Senior Sustainability Lead, Grade-A Office Operator, Bengaluru (pilot evaluator)

i Founder Senthil K Arumugam brings 35+ years of global hi-tech engineering leadership, providing enterprise credibility that accelerates pilot conversions and partnership activations.

Land via Karnataka, Expand Pan-India, Scale to GCC & SE Asia

Go-to-Market Phases

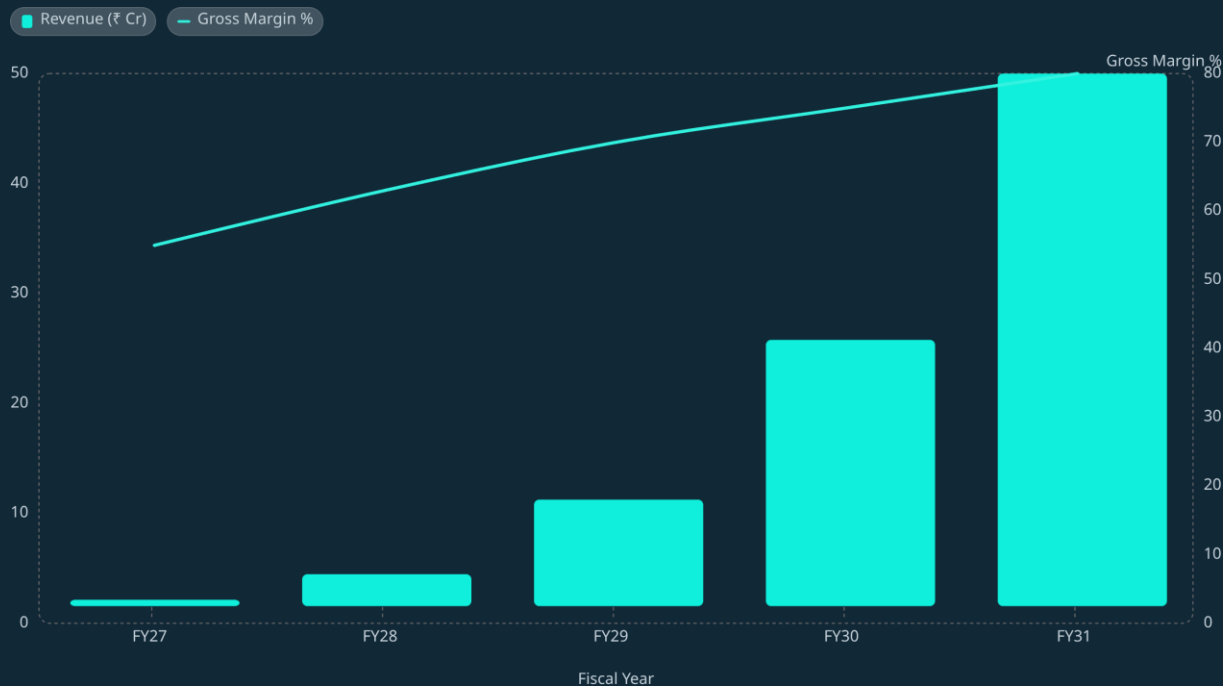

Sales Motion Mix

- Enterprise outbound to sustainability heads and facility managers
- Partner-led via FM majors and sustainability consultancies
- Government smart-city tenders (Karnataka infra first)
- Demand-gen through KITS, Elevate network, and ESG events

Karnataka Advantage

40 — representing the highest density of potential early adopters globally for an ESG-native SaaS platform targeting knowledge-economy enterprises.

Path to ₹50 Cr ARR with Disciplined Capital

Revenue Trajectory

- **FY27:** ₹0.6 Cr — 5 Cielo Epic pilots, product hardening
- **FY28:** ₹3 Cr — 30 sites, 3 Mints per customer avg.
- **FY29:** ₹10 Cr — 100 sites, pan-India channels live
- **FY30:** ₹25 Cr — 250 sites, international pilots
- **FY31:** ₹50 Cr — 500+ sites, 80

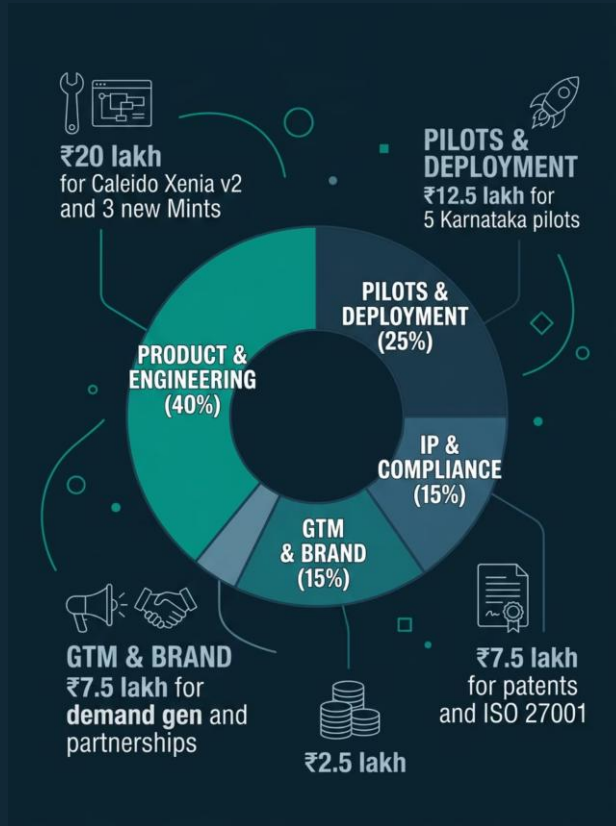

Key Financial Milestones

- Break-even target: **Month 30** →
-
-
- Series A readiness by end of FY28

Capital efficiency: Projections are built on conservative ACV assumptions of ₹6–12 lakh per site, with upside from large enterprise multi-site deals.

Every Rupee of the ₹50 Lakh Grant Compounds into Pilots, IP, and Revenue

1

Product & Engineering — ₹20 L (40%)

Finalise Caleido Xenia v2 core, ship 3 new Caleido Mints, harden Cielo Epic for enterprise deployment, edge firmware development.

2

Pilots & Deployment — ₹12.5 L (25%)

5 paid Cielo Epic pilots in Karnataka — hardware procurement, BMS integration, ML model tuning, and go-live support.

3

IP & Compliance — ₹7.5 L (15%)

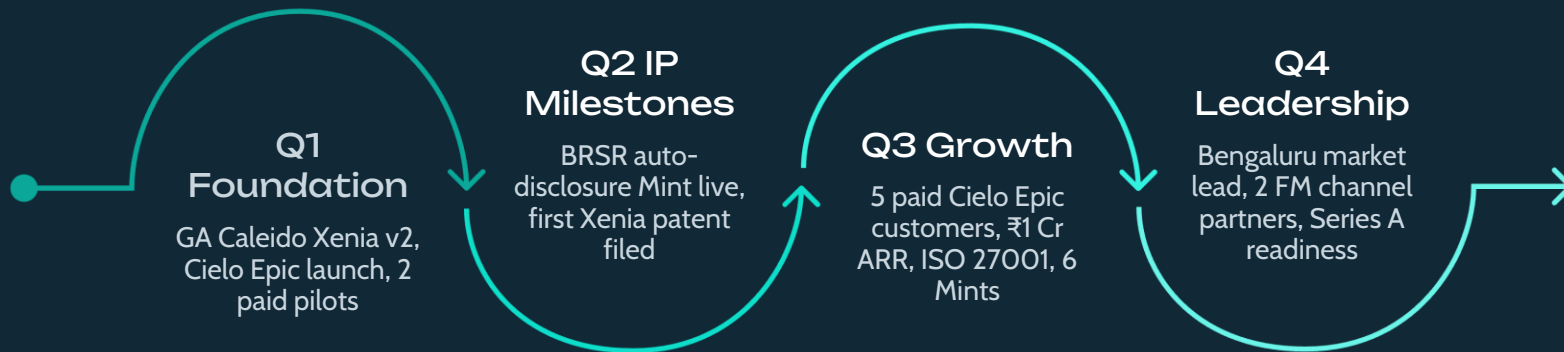

Patent filings for Xenia decision-graph, ISO 27001 readiness assessment, and security audit completion.

4

GTM & Brand — ₹7.5 L (15%)

Enterprise demand-generation, ESG conference presence (Bengaluru, Mumbai), and channel partnership activation.

Clear Milestones Tied to Elevate Disbursement Tranches

Q1 — Foundation

GA of Caleido Xenia v2 · Cielo Epic commercial launch · 2 paid pilots signed in Karnataka.

Q2 — IP Milestones

BRSR auto-disclosure Mint live · First Xenia patent application filed · 4 Mints in library.

Q3 — Revenue Proof

5 paid Cielo Epic customers · ₹1 Cr ARR achieved · ISO 27001 certified · 6 Mints live.

Q4 — Scale Ready

Bengaluru market leadership · Partnerships with 2 FM majors · Series A readiness materials complete.

Built in Karnataka. Built for the Planet.

Impact for Karnataka

- Positions the state as **India's ESG-tech capital**
- 25 high-skill engineering and sustainability roles by FY28
- Pilots in government buildings and smart-city projects
- Open ESG data standards + university partnership pipeline
- Climate-tech talent development in Karnataka's engineering ecosystem

Impact for Customers

15–25%

Energy Savings

Per deployed site

30%+

ESG Reporting Time Saved

UN SDG Alignment

SDG 7

Affordable & Clean Energy

SDG 9 & 11

Industry Innovation · Sustainable Cities

SDG 13

Climate Action

Operators, Engineers, and ESG Practitioners — Built to Ship

Senthil K Arumugam

Founder & CEO, Inspironics Group
35+ years of global hi-tech engineering leadership across USA and India. IIT IMPACT program panel advisor. Founded and scaled technology companies in both markets. Deep domain expertise in intelligent systems and enterprise infrastructure.

Advisory Board

Industry veterans from deep-tech, ESG finance, enterprise SaaS, and Karnataka's startup ecosystem. Provides strategic guidance on enterprise sales, compliance architecture, and international expansion. *[Names and affiliations to be confirmed prior to pitch]*

Hiring Plan

Actively recruiting in Karnataka:

- Firmware & Edge Systems Engineers
- Cognitive Systems / ML Engineers
- Electronics Hardware Engineers
- ESG Product Specialists

Target: 10 hires within 12 months of grant disbursement.

₹50 Lakh from Elevate → 5 Cielo Epic Lighthouse Pilots, 2 Patents, ₹1 Cr ARR in 18 Months

What We Are Seeking

- **Grant-in-aid of ₹50 lakh** under Elevate 2026 seed stage
- Access to Karnataka government pilot opportunities
- KITS network and mentor access for enterprise introductions
- Elevate brand validation for enterprise and investor credibility

Why Karnataka. Why Inspironics.

- Karnataka-registered, Karnataka-headquartered, Karnataka-committed
- Bengaluru's GCC density is our highest-value beachhead market
- Deep-tech IP stack aligned with Karnataka's innovation priorities
- ESG and climate-tech directly supports the state's sustainability agenda

- **Our commitment:** Every lighthouse pilot will be delivered in Karnataka. Every patent will be filed from Bengaluru. We are building category leadership from here.

Let's Engineer a Sustainable, Intelligent Future — Together.

We would be honored to partner with Elevate 2026 and the Karnataka Startup Cell to build India's leading cognitive ESG infrastructure platform from Bengaluru.
